

## HALOPOLYMER PRODUCT RANGE DEVELOPMENT

- Traditional grades
- Marketed grades
- Grades under development

### APPLICATIONS OF NEW GRADES:

- GP-100, FC-30: big billets of standard and premium quality;
- FC-15: for compounding;
- FF-850: free flow grade for high performance isostatic and automatic molding and molding sheets production;
- FCM-40: big billets (with higher mechanical properties), general purposes with improved mechanical properties, lining systems, extremely thin skived films, flex fatigue applications;
- TG-M: RAM extrusion of rods and pipes with high mechanical properties;
- FFM-800: modified free flow grade for high performance isostatic molding and molding sheets production with better mechanical properties;
- DM-1500 (med-high RR): high performance paste extrusion.

Head Office:  
HaloPolymer  
Russia, Moscow, 125284  
Leningradskiy prospect,  
Business center «Monarch», 31A,  
building 1, 30th floor
